

SPR E-BULLETIN, January 23, 2004

1. WILLIAM T. GRANT SCHOLARS PROGRAM FOR RESEARCH IN YOUTH DEVELOPMENT

The William T. Grant Foundation (<http://www.wtgrantfoundation.org/>) supports original research designed to further the understanding of the factors that influence the well-being and healthy development of adolescents and young adults.

The foundation's William T. Grant Scholars Program supports, over a five-year period, promising post-doctoral researchers from diverse disciplines. Priority research areas are youth development; improving programs, policies, and institutions affecting young people; and adults' use of evidence and their views of youth. The foundation focuses on young people ages 8-25, and is particularly interested in research that is interdisciplinary; examines young people in social, institutional, community, and cultural contexts; and addresses questions that advance both theory and practice.

Every year, four to six William T. Grant Scholars are selected, and each receives \$300,000 distributed over a five-year period. Through the foundation's annual Scholars' retreat and other activities, the William T. Grant Scholars are encouraged to continue inter- and multi-disciplinary collaboration and interchange.

See the William T. Grant Foundation Web site for complete program information.
