1. SIXTH ANNUAL eHEALTH DEVELOPERS' SUMMIT, SEPT. 29-30, 2005

The Conference Center at Harvard Medical, Boston, MA; September 29-30, 2005 Registration Deadline: September 15, 2005 The eHealth Developers' Summit is the premier annual meeting for executive- and manager-level eHealth business leaders, developers, and funders. The Summit is the only national meeting that is solely focused on issues of eHealth dissemination, commercialization, and adoption. The Summit fosters business relationships and collaboration among business leaders, developers, and funders from commercial entities, academia, government, and the nonprofit sector.

2. THE NIH ROADMAP: INVITING DRUG ABUSE AND ADDICTION RESEARCHERS TO CONTRIBUTE TO THE CLINICAL RESEARCH ENTERPRISE

This meeting is scheduled on October 24, 2005 at the Bethesda North Marriott Hotel and Conference Center. This year NIH is launching a new effort to catalyze the development of a new discipline of clinical and translational sciences within the Roadmap initiative: "Re-engineering the Clinical Research Enterprise." The purpose of this October symposium is to inform drug abuse and addiction clinical researchers and translational research teams about the scientific opportunities available within this revised Roadmap initiative. The website for this symposium can be found [here](#).

3. INTENTION TO RE-ISSUE NIH ROADMAP RFA, "TRAINING FOR A NEW INTERDISCIPLINARY RESEARCH WORKFORCE"

The purpose of this notice is to inform potential applicants about the intention to re-issue the NIH Roadmap RFA, Training for a New Interdisciplinary Research Workforce, originally issued December 16, 2003 as RFA-RM-04-015. This RFA solicited institutional training grants using the T90/R90 mechanism. The goal of this program was to train a cadre of investigators who will use novel interdisciplinary approaches to address complex biomedical problems. Interdisciplinary training, in this program, was intended to encompass multiple disciplines so that trainees would be capable of melding the disciplines to arrive at novel experimental approaches. Although several interdisciplines exist, such as bioengineering and biocomputing, the intent of this program was to facilitate the development of new interdisciplines via training in disciplines that do not typically intersect. The full text of the original RFA may be found [here](#). The anticipated release date for the RFA is September, 2005 with applications due in February or March, 2006. The announcement will be published in the NIH Guide for Grants and Contracts in the usual manner.

4. Go to the SPR Career Opportunities page (<http://www.preventionresearch.org/sprcareers.php>) to learn about these newly posted job openings:

Director of Research and Program Services Division, Xtria, Vienna, VA  
Postdoctoral Research Position, University of Kentucky, Lexington, KY  
Associate Professor, Rutgers University, Piscataway, NJ

To post your own job opening send an email with an URL or text to [info@preventionresearch.org](mailto:info@preventionresearch.org).
