

**Society for Prevention Research  
2010 Call for Award Nominations**

**Awards Criteria**

Awards are designed to recognize excellence in the areas consistent with SPR's mission. The specific awards are as follows:

- 1. The Presidential Award** is given to an individual or a team of individuals who have made a major specific contribution to prevention science research. This award is intended to be a "lifetime achievement" award for a significant body of research or theory in any area related to prevention that has had a major impact on the field. The award can be for an entire research program extending over many years or for a single study that changed the field substantially. The awardee(s) may represent the fields of epidemiology, statistical methodologies, research design, or prevention strategies including interventions and policies.
- 2. The Prevention Science Award** is given to an individual or team of individuals for a significant body of research that has applied scientific methods to test one or more preventive interventions or policies. This award recognizes individuals for the work of developing and testing prevention strategies.
- 3 The Public Service Award** is given to an individual or team of individuals in recognition of extensive and effective advocacy (to include dissemination and diffusion) for prevention science and science/research-based programs.
- 4. The Science to Practice Award** is given to an individual or a team of individuals in recognition of continued support of the implementation of research based prevention practices in real world settings. This award is typically given to prevention practitioners, decision makers or policy makers.
- 5. The Nan Tobler Award for Review of the Prevention Science Literature** is given to an individual or a team of individuals for contributions to the summarization or articulation of the empirical evidence relevant to prevention science.
- 6. Community, Culture, and Prevention Science Award** is given to an individual or a team of individuals for contributions to the field of prevention science in the area of community and culture. Recipients of this award are recognized for work to enhance understanding of and the development of, and adaptation of effective prevention strategies for traditionally underserved populations, including racial and ethnic groups.
- 7. International Collaborative Prevention Research Award** is given to an individual or a team of individuals for contributions to the field of prevention science in the area of international collaboration.
- 8. Service to SPR Award** is given to an individual or a team of individuals in recognition of outstanding service to the organization.

**9. Friend of ECPN Award** is to be presented to a mid-career or senior preventionist who has supported and encouraged early career persons or issues. The recipient of the Friend of ECPN award will have been active in supporting early career activities, either by helping ECPN as an organization; promoting training, funding, or early career involvement in prevention efforts; or encouraging early career preventionists in their work.

**10. ECPN Early Career Award** is presented to a person early in their career in prevention. This award will be bestowed on someone who has shown a commitment to prevention science through outstanding contributions to research, policy or practice.

**11. ECPN Service Award** is presented to someone who has shown a commitment to the development and advancement of ECPN. The intention of this award is to recognize contributions above and beyond traditional steering committee responsibilities.
