

Post-Doctoral Positions in the Integration of Prevention and Statistical Methodology

Based on funding from the National Institute on Drug Abuse, The Pennsylvania State University has available a post-doctoral position in an interdisciplinary Prevention and Methodology Training (PAMT) program. The training program is a collaborative effort involving two well-established and vibrant research centers at Penn State, the Prevention Research Center and the Methodology Center. The purpose of the program is to produce scientists trained in the integration of prevention and statistical methodology. These positions present a unique opportunity for highly motivated recent PhDs to continue their training in a synergistic environment that includes highly qualified prevention scientists and methodologists. For a description of this opportunity please see: www.prevention.psu.edu/grad/PAMT_postdocs.html
