

Epidemiology Faculty Position

The University of Texas School of Public Health (UTSPH), Brownsville Regional Campus invites applications for a tenure-track position in epidemiology at the Assistant Professor level. This position will enable UTSPH to expand a rapidly growing translational research program aimed at understanding and preventing obesity, diabetes and related co-morbidities. This is an exciting opportunity to join an established faculty group focused on teaching, research and community service to address public health needs in the Lower Rio Grande Valley and along the U.S.-Mexico Border.

Located in tropical Texas less than a mile from the Mexican border, the program has population-based studies in a minority, underserved, binational community. Infrastructure includes a vigorous and innovative outreach program, an extensively documented Hispanic cohort, a Clinical Research Unit and a well-equipped and staffed laboratory (BSL-2/3). Focus is on under-studied complications of diabetes (immune impairment, infections and mental health), and also well-known conditions (cardiovascular disease). Integration of behavioral, epidemiological and basic biological sciences offers novel opportunities in translational research for minority and international health populations. Infrastructure is provided by major collaborative grants and multi-site studies.

Qualifications include: (1) earned medical or doctoral degree with expertise in epidemiology; (2) commitment to excellence in teaching and advising graduate students; (3) a record or potential of both independent and collaborative research; (4) excellent written and oral communication skills; and (5) an interest in working on the U.S.-Mexico border with Hispanic populations.

Review of applications will begin immediately and continue until the position is filled. Candidates should e-mail a letter describing their qualifications and interests, along with their curriculum vitae and contact information for three professional references to: Susan P. Fisher-Hoch, MD (susan.p.fisher-hoch@uth.tmc.edu), Search Committee Chair, UT School of Public Health, 80 Fort Brown, RAHC SPH Bldg. Brownsville, TX 78520. Additional information about the UT School of Public Health can be found at <http://www.sph.uth.tmc.edu/>.

The University of Texas Health Science Center at Houston is an EO/AA employer. M/F/D/V. This is a security-sensitive position and thereby subject to Texas Education code §51.215. A background check will be required for the final candidate.
