

## **Survey Research Analyst**

**International Survey Associates** is a 26-year-old company whose main focus is providing schools and communities with research quality information on the attitudes, perceptions and behaviors of students and school staff in grades 4 through 12.

### **Key Role:**

Perform as a senior member of a team that develops and deploys surveys in numerous public school settings. The survey efforts emphasize measurement of alcohol, tobacco, and drug use, delinquency, and social/environmental characteristics associated with those behaviors. Also will be responsible for special studies for a variety of clients to understand particular issues of concern within their specific context. In addition, this person is responsible for ongoing proposal/grant development.

### **Basic Qualifications:**

7+ years of survey research or program evaluation experience in educational or social service settings.

7+ years of demonstrated success developing grant proposals for technical and analytical project efforts.

7+ years of experience developing narrative client reports that convey technically sophisticated survey findings to both professional and lay audiences.

7+ years of experience with complex data manipulation, statistical analysis and statistical modeling.

PhD or EdD with quantitative emphasis in the social or behavioral sciences.

### **Additional Qualifications:**

Specific experience working with epidemiological issues related to adolescent behavioral problems.

Experience in managing project teams in multiple, concurrent programs, with overlapping deadlines.

Experience working productively with educational or government clients.

Experience presenting results to senior personnel in government or educational settings.

Experience in survey research involving automated reporting systems.

Experience in online survey creation.
