Can Prevention Reduce Health Disparities and Inequalities? (Society for Prevention Research Strategic Goal 4) An Example of THE Power of Prevention

Richard F. Catalano, PhD

President

Society for Prevention Research

Dr. Richard Catalano is the Bartley Dobb Professor for the Study and Prevention of Violence and the co-founder of the Social Development Research Group, which is affiliated with the UW School of Social Work. He received his bachelor's degree in sociology from the University of Wisconsin, and his masters and PhD in sociology from the University of Washington. For more than 30 years, he has led research and program development to promote positive youth development and prevent problem behavior. Dr. Catalano's work has focused on discovering risk and protective factors for positive and problem behavior, designing and evaluating programs to address these factors, and using this knowledge to understand and improve prevention service systems in states and communities. He has served on expert panels for the National Academy of Science, Federal and State government, and foundations.

Richard F. Catalano, PhD

He has published over 350 articles and book chapters. His work has been recognized by practitioners (1996 National Prevention Network's Award of Excellence); criminologists (Fellow of the Academy of Experimental Criminology, 2007 August Vollmer Award from the American Society of Criminology, and 2003 Paul Tappan Award from the Western Society of Criminology); prevention scientists (2001 Prevention Science Award and 2012 Presidential Award from the Society for Prevention Research, President, Society for Prevention Research), and social workers (Fellow in the American Academy of Social Work and Social Welfare).

Dr. Catalano is a member of the Washington State Academy of Sciences. He is the co-developer of the Social Development Model; the parenting programs "Guiding Good Choices," "Supporting School Success," "Staying Connected with Your Teen," and "Focus on Families;" the school-based program, "Raising Healthy Children;" and the community prevention approach, "Communities That Care."

SPR 2016 FELLOWS

This year, we are pleased and proud to present the fourth cohort of **SPR Fellows**. The SPR Fellowship is an honor that the Society for Prevention Research bestows upon a small and select group of members who have a particularly distinguished record of contributions in the field of prevention research. A distinguished record reflects a substantial body of work that has had a broad and significant impact on prevention science.

Brian Flay, DPhil

Professor, School of Social and Behavioral Health Sciences
Oregon State University

Robert McMahon, PhD

Founder and Director
Institute for the Reduction of Youth Violence
Professor, Department of Psychology
LEEF B.C. Leadership Chair in Proactive Approaches to
Reducing Risk for Violence among Children and Youth
Simon Fraser University

Steven Schinke, PhD

D'Elbert and Selma Keenan Professor of Social Work
Acting Director, Social Enterprise Administration Program
Columbia University

SPR 2016 FELLOWS

Brian R. Flay, DPhil

Dr. Brian Flay has had a distinguished career spanning several decades, from the beginning of his professional experience in 1966 as Instructor of Statistics to his joint appointment at both Oregon State University (as Professor of Health Promotion and Health Behavior) and Boise State University (as Research Professor in the College of Education and Associate Director at the Initiative for Health Schools).

The reoccurring themes of Dr. Flay's projects address health disparities and promote health equity, such as his AbanAya project to develop and evaluate a school curriculum and community program for African-American youth in urban Chicago. Dr. Flay was also a member of the Promise Neighborhoods Research Consortium (PNRC), a collaborative effort between researchers and community members to improve wellbeing in high poverty neighborhoods.

Dr. Flay's work in Prevention Science includes collaboration with colleagues to develop the Theory of Triadic Influence (TTI). The TTI unifies concepts from a multitude of health behavior theories into one comprehensive framework. During his professional career, he has served as the Deputy Director for the Institute for Health Promotion and Disease Prevention Research at the University of Southern California; the Director of the Prevention Research Center and Health Research and Policy Centers at the University of Illinois-Chicago; Director of the Hallie Ford Center for Healthy Children and Families at Oregon State University; and Associate Director for the initiative for Health Schools at Boise State University.

In addition to his impressive research contributions, Dr. Flay has also maintained his commitment to teaching and service including his track record of exceptional mentorship. Dr. Flay has been known to “ask for the moon” from his mentees. By holding himself up to this same standard, he has made a significant impact on the field of Prevention Science.

Robert McMahon, PhD

Dr. Robert McMahon has and continues to be a highly productive member of the Society for Prevention Research and has made numerous and important contributions to SPR, including being Editor-in-Chief of the scientific journal, *Prevention Science* for 7 years. He was recruited to the prestigious position of LEEF BC Leadership Chair in Proactive Approaches to Reducing Risk for Violence Among Children and Youth at Simon Fraser University after 23 productive years at the University of Washington. He is also an SFU Professor of Psychology and a Senior Scientist at the British Columbia Children's Hospital.

Dr. McMahon has been instrumental, both nationally and internationally, in establishing high quality basic and intervention/prevention work on parenting and early aggressive behavior. His research has included the study of parenting and the development of treatment models and preventive interventions focused on both risk and protective factors related to parent and childhood aggression as well as assessing the effectiveness of treatments. He has also studied the comprehensive preventive interventions for children with early, serious conduct problems.

Dr. McMahon was one of the primary developers of the Helping the Non-Compliant Child (HNC) program providing extensive training and outreach across the world. His intellectual leadership has also led to the development and implementation of the family-centered intervention component of the FAST Track program, which has been influential in conferring long-term benefits lasting into adulthood to those with highest risk.

For over 30 years, Dr. McMahon has been a co-coordinator of the Banff International Behavioral Science Conferences, a group of researchers, practitioners, and

students for an intensive two-day experience on a critical topic in child psychopathology, with prevention as a major focus. Through these meetings, he has created numerous opportunities for mentoring, leadership and collegial collaboration. He is known to collaborate with many prevention science groups and is valued by all.

Steven Schinke, PhD

Dr. Steven Schinke is one of the leading prevention scientists in the world and has made major contributions to various aspects of prevention science from the conceptual level to the practical level, positively affecting the behavioral development of children and adolescents. His academic career has been devoted to the advancement of prevention science, with a focus on adolescent populations. Across his research, he has reported findings from prevention trials conducted on a host of health behavior problems associated with adolescents.

Dr. Schinke and his team have developed and tested prevention models to equip adolescents with cognitive-behavioral skills for addressing a range of health behavior risks including pregnancy among adolescent girls and sexual risk-taking related to STIs and HIV/AIDS. He and his colleagues have gone on to apply their cognitive-behavioral prevention approaches for adolescents to reducing risks of drug use and abuse, and the risks of early and problematic alcohol use.

A major thrust of Dr. Schinke's work has been to culturally adapt, implement, test and disseminate prevention models for tobacco use among youth. This program of research produced various intervention materials that are now nationally disseminated by the National Cancer Institute.

Dr. Schinke has been an integral part of the Society for Prevention Research from its inception. He was one of the founding members of SPR, served as its first President, and helped to incorporate SPR as a nonprofit entity. With the help of his wife, Mary Schinke, Attorney at Law, Dr. Schinke established the initial organizational framework for SPR, including its membership, financial, governance, and annual meetings structures. Dr. Schinke was one of

the first Associate Editors to the Prevention Science journal and has served in that capacity for more than 15 years.

Among colleagues both nationally and internationally, Dr. Schinke is highly respected and his advice is greatly valued. As a result, he has not only had a major influence of prevention research in the U.S., but also in numerous other countries interested in improving prevention through the use of science-based methods.

SPR 2016 AWARDS

The Society for Prevention Research

Sloboda and Bukoski Cup

To be announced by Leslie Leve, PhD and
Marie-Hélène Véronneau, PhD

Presidential Award

Nicholas Ialongo, PhD

Professor, Department of Mental Health
Johns Hopkins Bloomberg School of Public Health

Advances in Culture and Diversity in

Prevention Science Award

Brian Mustanski, PhD

Director, Institute for Sexual and Gender
Minority Health and Wellbeing
Associate Professor in Medical Social Sciences,
Psychiatry and Behavioral Sciences and
Weinberg College of Arts and Sciences
Northwestern University Feinberg
School of Medicine

Prevention Science Award

Kevin P. Haggerty, PhD

Director, Social Development Research Group
Director of Research and Associate Professor,
School of Social Work
University of Washington

Translation Science Award

Diana Fishbein, PhD

Director, Edna Bennett Pierce Prevention Center,
C. Eugene Bennett Chair in Prevention Research,
Professor of Human Development and Family Studies
College of Health and Human Development
The Pennsylvania State University

Public Service Award

Jeffrey Levi, PhD

Professor, Health Management and Policy,
Milken Institute School of Public Health
The George Washington University

 Department of Educational Methodology, Policy,
 and Leadership
 Director, Center for Equity Promotion
 University of Oregon

SPR 2016 AWARDS

Nan Tobler Award for the Review of the Prevention Science Literature

Alexander Wagenaar, PhD

Professor, Health Outcomes and Policy
University of Florida College of Medicine

Friend of ECPN

J. David Hawkins, PhD

Endowed Professor of Prevention,
School of Social Work
Founding Director, Social Development Research Group
University of Washington

ECPN John B. Reid Early Career Award

Keryn Pasch, MPH, PhD

Associate Professor, Department of Kinesiology
and Health Education
University of Texas, Austin

AWARDS

The **SPR Sloboda & Bukoski Cup** is presented to the team winning the annual SPR Cup Competition. The SPR Cup is an opportunity for a unique experience: several independent groups of scientists, each working with the same data set prior to the conference, conducted a literature review, generated hypotheses, conducted analyses, and prepared a presentation. Teams presented their results at a special symposium during the SPR Annual Meeting. A panel of judges and audience members rated the quality of the research and the presentation.

Presidential Award

Nicholas Ialongo, PhD

*The **Presidential Award** is given to those who have made a major lifetime contribution to prevention science research.*

This year, we are pleased to present the **Presidential Award** to **Dr. Nicholas Ialongo**, Professor of Mental Health and Director of the Johns Hopkins Prevention Research Center (PRC) at the Johns Hopkins University Bloomberg School of Public Health. Dr. Ialongo has made several major contributions to prevention science research and led a significant body of research to develop and test multiple preventive interventions. He has been at Johns Hopkins since the late 1980s, first as a postdoc, then as faculty since the 1990s. He has collaborated with numerous colleagues to sustain federal funding for the PRC research trials and expand the work in important areas.

Dr. Ialongo is a world-class prevention science researcher who has maintained a federally-funded program of prevention research throughout his career. Over the past 15 years, Dr. Ialongo has launched a new line of PRC

research in the area of genetics. Much of his self-study in this area leveraged the PRC trial data and was launched through his receipt of a prestigious NIDA Merit Award.

The dynamic accomplishments of Dr. Ialongo's work include the effects of the Baltimore interventions during early school years (Good Behavior Game, Classroom Centered Intervention, Parenting Intervention) and its impact on later childhood, adolescence and early adulthood. Additionally, he has led a series of important studies over the past twenty years on how risk and protective factors influence both aggression and substance use across childhood and adolescence.

Dr. Ialongo has mentored countless early and mid-career researchers and provided them access to PRC data to help them not only develop their methodological skills but advance their own careers. He has also helped form and promote multi-site collaborations and data sharing related to the PRC datasets. Dr. Ialongo's high level of collaboration and willingness to share PRC data has resulted in inclusion in dozens of methodological papers as well as case illustrations in methods trainings and software user manuals.

Dr. Ialongo has made numerous contributions to SPR, serving as a member of the board and as regular reviewer and editorial board member for the journal, *Prevention Science*. He continues to impact how research is conducted, show new areas for study and provide practice-influencing science of the highest quality.

**Advances in Culture and Diversity in
Prevention Science Award**

Brian Mustanski, PhD

*The **Advances in Culture and Diversity in Prevention Science Award** is given for contributions to the prevention science in the area of community and culture.*

This year, we are pleased to present the **Advances in Culture and Diversity in Prevention Science Award** to **Dr. Brian Mustanski** who is an Associate Professor of Medical Social Sciences, Psychiatry and Behavioral Sciences and Psychology at Northwestern University; Director of the Institute for Sexual and Gender Minority Health and Wellbeing and the IMPACT Program; and Co-Director of the Third Coast Center for AIDS Research.

A central focus of Dr. Mustanski's research is on the relationships between mental, behavioral, and physical health, particularly as they relate to HIV/AIDS in vulnerable populations. Dr. Mustanski's research contributions were recognized by the Society for the Psychological Study of Lesbian, Gay, Bisexual and Transgender Issues (Division 44 of the American Psychological Association), who awarded him their Award for Distinguished Scientific Contributions. He was named a William T. Grant Scholar to study how the internet can be used to advance the sexual health of LGBT youth.

Specific to HIV prevention, Dr. Mustanski created Keep it Up, an online HIV prevention program for young men who have sex with men who recently tested HIV negative and Queer Sex Ed, an online sexual health education program for LGBT youth funded by the WT Grant Foundation. Through a grant from the Health Resources and Services Administration, Dr. Mustanski is training a cadre of young researchers in the nation's first LGBT Health Psychology

internship program, the focus of which is on LGBT health research and clinical/public health services.

Partnerships with the LGBT community have been a hallmark of Dr. Mustanski's career. He has established longstanding partnerships with many LGBT serving organizations in Chicago, including the Center on Halsted and the Puerto Rican Cultural Center. With his community partners, he co-organizes an annual Chicago LGBT Health and Wellness Conference that brings together Midwestern scholars and service providers to advance LGBT health.

Through his research, his development of preventative interventions, his community involvement with the young LGBT community and his training of the next generation of HIV prevention researchers and practitioners, Dr. Mustanski has made significant contributions that "enhance our understanding of and the development of, and adaptation of effective prevention strategies for traditionally underserved populations."

Prevention Science Award

Kevin Haggerty, PhD

*The **Prevention Science Award** is given for the work of developing and testing prevention strategies.*

This year, we are pleased to present the **Prevention Science Award** to **Dr. Kevin Haggerty** who is the Director of the Social Development Research Group (SDRG) and Associate Professor at the University of Washington School of Social Work. Dr. Haggerty is an international leader in the field of prevention research, developing and evaluating prevention strategies for more than 30 years. For the past 25 years, Dr. Haggerty has directed nearly all clinical intervention research projects at SDRG. His research spans the prevention translation continuum and includes basic etiological research on risk and protective factors for substance use, development, implementation and evaluation of efficacy trials, and implementation and evaluation of effectiveness trials.

Dr. Haggerty has dedicated his career to reducing substance use and other problem behaviors among youth and adults and to improving the social conditions that promote well-being and increase health equity. His efforts have focused on programs targeting high-risk youth, families, schools and communities and he has worked across developmental stages, designing interventions for youth in elementary grades through high school. He has developed programs for children parents and schools, including aftercare for incarcerated youth; relapse prevention for methadone patients; parent training for general populations, foster care families, and methadone patients; teacher and staff development school-based interventions; and community organization preventive

interventions. He has provided numerous training workshops and seminars to teachers, child welfare workers, juvenile corrections workers and drug treatment providers in a variety of evidence-based prevention and treatment practices and programs.

Dr. Haggerty has been an active member of the Society for Prevention Research, serving on the Board in 2001-2003 and again in 2011-2013. He served as Chair of the 2007 SPR Annual Meeting and has been an Action Editor and reviewer for Prevention Science.

Translation Science Award

Diana Fishbein, PhD

*The **Translation Science Award** is given to an individual in recognition for contributions to the field of prevention science in the area of Type 1 or Type 2 translational research.*

This year, we are pleased to present the **Translation Science Award** to **Dr. Diana Fishbein**, Director of the Edna Bennett Pierce Prevention Center, C. Eugene Bennett Chair in Prevention Research and Professor of Human Development and Family Studies at The Pennsylvania State University Department of Human Development and Family Studies.

Dr. Fishbein has conducted studies utilizing transdisciplinary methods and a developmental approach to understanding interactions between neurobiological processes and environmental factors. Additionally, she led studies that found deficits in certain neurobiological functions and the effects of preventive and treatment interventions. Fishbein's ultimate research goal is to translate scientific findings to practice and policies designed to prevent mental health, emotional and behavioral problems.

Dr. Fishbein is the co-creator of the National Prevention Science Coalition to Improve Lives, a national organization dedicated to the transfer of knowledge from the basic to the applied sciences as well as practical settings and public health policies. She also wrote the etiology section of the International Standards for Drug Abuse Prevention for the United Nations, and developed a training curriculum for policy-makers worldwide.

Public Service Award**Jeffrey Levi, PhD**

*The **Public Service Award** is given in recognition of extensive and effective advocacy for prevention science and research-based programs.*

This year, we are pleased to present the **Public Service Award** to **Dr. Jeffrey Levi** who is a Professor of Health Management and Policy at The George Washington University Milken Institute School of Public Health, where his work focuses on the intersection of public health, the health care system and the multi-sector collaborations required to improve health. Dr. Levi has been a long-time advocate for incorporating prevention and public health into physical and mental health research and practice.

At the end of 2015, Dr. Levi completed a ten-year tenure as Executive Director of the Trust for America's Health, where he led the organization's advocacy efforts on behalf of a modernized public health system, including implementation of the public health provisions of the Affordable Care Act and annual reports assessing the nation's public health preparedness, investment in public health infrastructure, and response to chronic diseases such as obesity. He currently serves as the Chairperson of the Presidentially-appointed Advisory Group on Prevention, Health Promotion, and Integrated Public Health, and advises the Affordable Care Act committee.

Dr. Levi served as a consultant to the Institute of Medicine's Committee on Public Financing and Delivery of HIV Care in the U.S., as well to its Committee on HIV Prevention Strategies in the United States. He also serves as faculty for the National Breast Cancer Coalition's Project Quality LEAD, a training course designed to help breast cancer activists influence quality care in their communities and public policy processes.

International Collaborative Prevention Research Award

Guillermo “Willy” Prado, PhD

*The **International Collaborative Prevention Research Award** recognizes contributions to the field of prevention science in the area of international collaboration.*

This year, we are pleased to present the **International Collaborative Prevention Research Award** to **Dr. Guillermo “Willy” Prado and his team.**

Dr. Prado is currently the Leonard M. Miller Professor of Public Health Sciences and the Director of the Division of Prevention Science and Community Health at the University of Miami Miller School of Medicine’s Department of Public Health Sciences. He is also dean of the Graduate School at the University of Miami. Dr. Prado’s research focuses on the prevention of risky health behaviors, including drug use, unsafe sexual behavior, lack of physical activity, and poor dietary intake, associated with the top leading causes of morbidity and mortality in adolescents, and Hispanic youth in particular.

Dr. Prado and his team are recognized for their work in adapting and testing the feasibility and acceptability of Familias Unidas in Chile and Ecuador. He has been PI, Co-PI, co-investigator, or senior mentor of HIV, substance abuse, and obesity prevention studies, one of which is an effectiveness/Stage III study of Familias Unidas [United Families in English], one of the few preventive interventions found to be efficacious in preventing/reducing substance use, internalizing and externalizing symptoms and disorders, and HIV risk behaviors among Hispanic youth.

Dr. Prado has been recognized by numerous organizations, including the Society for Prevention Research, the Society for Research on Adolescence, and the National Hispanic Science Network on Drug Abuse. He

was also selected by the Miami Herald as one of the Top 20 Business Leaders and Innovators in South Florida under the age of 40 for his research and community work in the areas of HIV and substance use among Hispanic families. Dr. Prado is a member of the NIH study section Community Level Health Promotion, a member of the National Hispanic Science Network's Steering Committee, and was the 2013 Chair of the Society for Prevention Research's 21st Annual Meeting and the Co-Chair of the 2013 Meeting of the National Hispanic Science Network.

Santiago de Guayaquil Ecuador

Service to SPR Award

J. Mark Eddy, PhD

Charles Martinez, Jr., PhD

*The **Service to SPR Award** is given in recognition of outstanding service to the organization.*

This year, we are pleased to present the **Service to SPR Award** to **Dr. J. Mark Eddy** and **Dr. Charles Martinez, Jr.**

Drs. Eddy and Martinez are the Founders of the Sloboda and Bukoski SPR Cup and have led this initiative since its inception in 2006. The Sloboda and Bukoski SPR Cup is awarded annually to the winning team of early career researchers who participate in an intense workgroup experience. Each team conducts a literature review, generates hypotheses, conducts analyses, and prepares a presentation for the annual meeting. Now in its 11th year, 42 teams and 191 team members have participated in this highly successful event.

Dr. Eddy is a Senior Fellow Scientist and Licensed Psychologist at the Oregon Social Learning Center. Since 2011, he has worked as the Director of Research at Partners for Our Children in the School of Social Work at the University of Washington in Seattle, but has continued to be involved as the principal investigator on several studies that were developed at OSLC. During his years at OSLC, he served as the principal investigator on multiple randomized prevention trials of programs delivered within systems of care relevant to children and families. These include the Child Study, a multi-site randomized controlled trial of the Friends of the Children youth mentoring program; the Parent Child Study, a randomized trial of Parenting Inside Out, a parent management training with incarcerated parents within adult corrections; the Paths

Project, a study of the transition into young adulthood for youth who were heavily involved with the juvenile justice system and who participated in a randomized trial of Multidimensional Treatment Foster Care (MTFC, now known as Treatment Foster Care Oregon); and the Linking the Interests of Families and Teachers (LIFT) Project, a study of the transitions into young adulthood for participants in a randomized multi-modal school-based prevention intervention program that began during elementary school.

Dr. Martinez is a clinical psychologist, professor, and department head in the Department of Educational Methodology, Policy, and Leadership at the University of Oregon, where he also directs the Center for Equity Promotion. He served as the University of Oregon Vice President for Institutional Equity and Diversity from 2005 to 2011, and also served as a senior scientist at the non-profit Oregon Social Learning Center where he founded and directed the center's Latino Research Team beginning in 1999. He has served as a publicly elected member of the Eugene, District 4J School Board and is currently serving as a Governor appointed member of the Oregon State Board of Education representing Oregon's 4th congressional district. His substantive interests center on identifying factors that promote healthy adjustment for families and children following stressful life events, (e.g. changes in family structure, socioeconomic status, physical and/or emotional health, acculturation, and immigration status), taking into consideration the cultural contexts in which families operate.

Dr. Eddy and Dr. Martinez served as co-investigators on a variety of projects through the Oregon Social Learning Center Latino Research Team, including the Latino Youth and Family Empowerment Project, which developed and studied a culturally specific parent training intervention for Latino families with youngsters at risk for substance use and related problems; and the Adolescent Latino Acculturation Study, which was designed to learn more about how Latino families and their middle school youth who have immigrated to the U.S. adapt to life in this country.

Nan Tobler Award for the Review of the Prevention Science Literature

Alexander Wagenaar, PhD

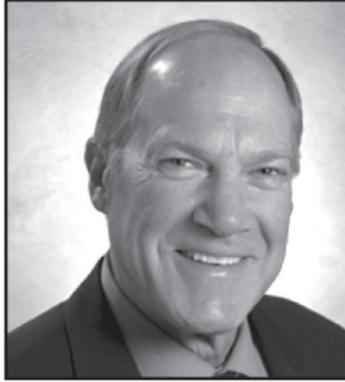

*The **Nan Tobler Award for the Review of the Prevention Science Literature** is given to an individual or team of individuals for contributions to the summarization or articulation of the empirical evidence relevant to prevention science.*

This year, we are pleased to present the **Nan Tobler Award** to **Dr. Alexander C. Wagenaar**. Dr. Wagenaar is Professor in the University of Florida, Department of Health Outcomes & Policy. He has published a book, numerous book chapters, and over 170 scientific articles on social epidemiology, public health policy, legal evaluations, community intervention trials, alcohol and tobacco studies, violence prevention, traffic safety, and injury control. He has a strong interest in evaluation of public policy changes and community-level interventions, using both randomized trial and controlled time-series research designs and statistical methods. He currently also serves as Associate Director of the Public Health Law Research Program at Temple University, the national program office for a \$17 million initiative of the Robert Wood Johnson Foundation. He is a scientific reviewer for two dozen journals, is a member of the Editorial Board of Prevention Science and the Journal of Safety Research, and is an Assistant Editor of the journal, Addiction.

Dr. Wagenaar's research focuses on three broad areas: (1) group-randomized or controlled time-series trials of preventive interventions at the state, community and institutional levels designed to improve the health of children and adolescents; (2) empirical evaluations of the effects of national, state and local public health policies;

and (3) meta-analyses of the literature on these topics. Particular content foci include alcohol use, automobile crashes, injuries and violence.

In 1999, Dr. Wagenaar received the prestigious Jellinek Award for lifetime achievement in research on alcohol. In 2001, he received the Innovator's Award from the Robert Wood Johnson Foundation, and in 2004 was named by the Institute for Scientific Information as a Highly Cited Researcher, an honor limited to less than one-half of one percent of published scientists worldwide. In 2009, he received the Prevention Science Award from the Society for Prevention Research for the contributions of his three decades of research in advancing the methods and outcomes of prevention research. In 2010, he received an honorary Research Professorship award from the University of Florida Foundation.

Friend of ECPN**J. David Hawkins, PhD**

*The **Friend of ECPN Award** is presented to a mid-career or senior preventionist who has supported and encouraged early career prevention scientists or issues. The recipient of the Friend of ECPN Award will have been active in supporting early career activities, either by helping ECPN as an organization; promoting training, funding, or early career involvement in prevention efforts; or encouraging early career preventionists in their work.*

This year, we are pleased to present the **Friend of ECPN Award** to **Dr. J. David Hawkins**. Dr. Hawkins is known for his passion for prevention and his commitment to excellence in research and mentoring. Dr. Hawkins has supported and mentored students with different experiences, and continues to mentor these individuals as they transition into their careers. Dr. Hawkins served as the Director of the Social Development Research Group at the University of Washington for 19 years. Dr. Hawkins has been integral part of developing the infrastructure to support students at the University of Washington. Dr. Hawkins is a Society for Prevention Research (SPR) Fellow and a leader in prevention science. Dr. Hawkins has made efforts for many years to support and mentor early career scientists in becoming leaders in prevention science. Dr. Hawkins has illustrated his supportive mentoring through coauthoring numerous presentations, manuscripts, and other publications with early career scientists. Dr. Hawkins has been integral in his students' success by providing mentorship and support to the many students and early career scientists as they developed their projects and through giving them feedback regarding their SPR presentations. Dr. Hawkins not only supports students,

he also continues to support and offer networking opportunities to his former students and many new professionals that he meets at conferences. It has been stated by many early career collaborators that Dr. Hawkins treats his mentees as valuable colleagues and treats them as such. He understands what early career scientists need to succeed as they advance in their careers and mentors in such a way to develop successful prevention scientists and junior faculty. Dr. Hawkins' commitment and passion for mentoring shines through in his interactions with students and early career professionals.

ECPN John B. Reid Early Career Award**Keryn Pasch, PhD**

*The **ECPN John B. Reid Early Career Award** is presented to an individual early in their career in prevention. This award is bestowed on someone who has shown a commitment to prevention science through outstanding contributions to research, policy, or practice.*

This year, we are pleased to present the **John B. Reid Early Career Award** to **Dr. Keryn Pasch**. Although it has been a short time since Dr. Pasch received her PhD (in 2007), she has an outstanding record of scholarship and service that contribute to the field of prevention science and make her an excellent candidate for this award. Dr. Pasch is a productive scholar with over 50 peer-reviewed publications since she graduated. In addition, Dr. Pasch has book chapters, an edited book, and numerous presentations. Dr. Pasch has been or is currently involved on several NIH, NCI, FDA, and the Texas Department of State Health Services grant funded research projects. Much of Dr. Pasch's work has related to prevention science focusing on youth and young adults, and their dietary and sleeping behaviors, and alcohol, tobacco, and substance use. She has conducted ground-breaking work in the area of media and marketing, and the influence they have on youth and young adult behaviors (see Pasch, Komro et al., 2007; Pasch, Komro et al., 2009; Velazquez & Pasch, 2014; and, Poulos & Pasch, 2015). Dr. Pasch is Associate Editor of Tobacco Regulatory Science, and Health Behavior and Policy Review, and is a reviewer for many others. Dr. Pasch has also provided extensive service to several national and international organizations. Dr. Pasch has been very involved in the Society for Prevention Research where she

has served on the Program Thematic Sub-Committee as Chair, Needs Assessment Survey Task Force as Co-Chair, Communications Task Force as Co-Chair, Early Career Preventionist Network (ECPN) Training Committee as Co-Chair, ECPN Steering Committee as Chair, SPR Training Committee, SPR Awards Committee, SPR Conference Planning committee, and on the SPR Board of Directors, just to name a few. Dr. Pasch has also excelled in teaching and mentoring. She has been the major advisor for 5 doctoral students, 6 masters' students, served on at least 14 other graduate students' committees, and has mentored at least 45 undergraduate research students. Dr. Pasch is most deserving of this award for early career prevention scientists.
