

## **Now Accepting Applications: Postdoctoral Fellowship in Prevention and Methodology**

The [Prevention and Methodology Training \(PAMT\) program](#) at [Penn State](#) has an opening for a postdoctoral fellow. PAMT, a joint effort between the [Prevention Research Center](#) and [The Methodology Center](#), cross-trains graduate and postdoctoral researchers as prevention scientists and methodologists. Through this National Institute on Drug Abuse (NIDA)-funded program, prevention researchers are trained in the latest and most innovative research methods, and methodologists gain an understanding of the realities and challenges facing prevention efforts in real-world settings. This program presents a unique opportunity for postdoctoral researchers to receive training from some of the top prevention scientists and methodologists in the country.

If you are interested in PAMT or if you know a researcher with strong methodological skills and a passion for prevention science, take a moment to review the [application requirements](#).

You can learn more about PAMT at <http://methodology.psu.edu/pamt/>. Please pass this along to colleagues who may be interested.

**Application review begins November 15** for a Spring 2013 opening (flexible start date) and **March 15, 2013**, for a Summer/Fall 2013 opening.
