

## Social Science Researchers

February 1, 2011

OMNI Institute's mission is to contribute to a broader understanding of social issues, help improve the effectiveness of social programs and strategies, strengthen the larger nonprofit and public service infrastructures, and guide the adoption of more effective state and federal social policies through the provision of high-quality, client-centered social science research and evaluation, technical assistance and training services.

OMNI is soliciting applications for a Researcher and Advanced Research Associate to join our staff and contribute to our efforts to improve social conditions through social science research and evaluation. The responsibilities of these positions will involve project management, independent research/evaluation, communication with clients, and oversight of work performed by research assistants, data managers and/or data entry specialists.

Applicants meeting all the following requirements and some of the preferred qualifications should apply for the Researcher position. Applicants meeting some of the following requirements as well as some of the preferred qualifications should apply for the Advanced Research Associate position.

- A minimum of a BA/BS in a social sciences related field and 5 years experience in research is required. Completion of a Master's degree is preferred and can offset number of years of experience required.
- Experience with project management is required. Experience with client management and staff supervision is preferred.
- Experience with data management, cleaning and restructuring of data as well as a thorough understanding of basic descriptive and inferential statistics is preferred.
- Applicants will be expected to work closely with community partners to collect, report, and use evaluation data. Prior experience is strongly preferred.
- Applicants must have strong analytic, written and verbal communication skills.
- Expertise in at least one of the following areas is required: Evaluation methods; statistics; public health and/or epidemiology; substance use prevention; systems integration and collaboration; and data utilization and technical assistance.

OMNI Benefits include a comprehensive healthcare package, eligibility to participate in a 401(k) plan with an employer match, employee wellness program and a dynamic and progressive working environment. Interested persons should send a cover letter that specifies any salary requirements, two areas of expertise (as identified above), and experience in main areas of responsibility including research, project management, and staff supervision. Please include a resume outlining qualifications, work history, and references to:
