Dear Colleagues,

The Prevention Science Graduate Program at Washington State University is seeking graduate students to apply to begin Fall 2022!

We are hosting a live informational webinar from **9-10 a.m. PST, Wednesday, November 3**, so prospective applicants may speak with our faculty, students, and alumni. Register for the webinar by completing a form here: [https://bit.ly/3ljGNKq](https://bit.ly/3ljGNKq)

See our “Program at a Glance” for short videos of some of our faculty introducing themselves and their research interests here: [https://hd.wsu.edu/preventionscience/](https://hd.wsu.edu/preventionscience/)

Please email us with any questions at [prev.sci@wsu.edu](mailto:prev.sci@wsu.edu)

**What is Prevention Science?**

Prevention Science is an interdisciplinary field that applies basic research on individuals, families, and their communities to the development, evaluation, and dissemination of scientifically based programs to promote the physical, social, and psychological well-being of individuals and their families. Students in our program are trained to:

- Conduct basic research on risk and protective factors.
- Design research-based prevention programs, practices, and policies.
- Evaluate programs under natural and controlled conditions.
- Make recommendations for social policy and the improvement of existing programs.

Learn more at our website here: [https://hd.wsu.edu/preventionscience/](https://hd.wsu.edu/preventionscience/)

**What can you do with a PhD in Prevention Science?**

Students with a PhD in Prevention Science are well qualified for a range of careers in many professional settings. Our graduates work as:

- Program evaluators, research analysts, and administrators in government for private research institutions (e.g., Rand Corporation), social service agencies, and consulting firms.
- Foundation program officers and grant evaluators.
- Tenure-track faculty members in departments of child development, communication, developmental psychology, educational psychology, family studies, human development, public health, nursing, sociology, and social work.
- Research associates and program coordinators for grant funded projects.
